for exploring

“Mechanisms for nZEB Renovation of Existing Public Building Stock”

CERTuS slot is: 15 June – 09:00-12:30

Venue: Residence Palace: Rue de la Loi, 155, B-1040 Brussels, Belgium -

<http://www.presscenter.be/page/how-to-get-to-the-residence-palace>

Dear Sir, Dear Madame,

CERTuS project - <http://www.certus-project.eu> - is an EC-financed programme promoting nearly Zero Energy Renovation of existing buildings through the development of cost efficient options and financing mechanisms to bring real benefits for cities and citizens. CERTuS has been selected to take part to the Networking Village during the **European Sustainable Energy Week 2016** with a stand entitled **“Mechanisms for nZEB Renovation of Existing Public Building Stock”** on the **15th June 2016 from 09:00 to 12:30** to present relevant project results.

We would like to invite you to our stand that will take place in the Networking Village in the **Residence Palace, rue de la Loi, 155, B-1040 Brussels**.

On this occasion CERTuS will present a number of remarkable opportunities for your city as we will showcase twelve case studies dealing with **energy retrofitting of existing public buildings** from an economic and technical point of view in 4 EU municipalities (Alimos – Greece, Coimbra – Portugal, Errenteria – Spain and Messina – Italy)

Benefits to attend

CERTuS project stand aims to give better knowledge on the energy service market for energy renovation of public buildings. The intended beneficiaries of project's outcomes are Cities, ESCOs, financial organisations/investors and entrepreneurs working in the energy and building sector.

By visiting our stand and participating to our 'One2One meetings', you will get insights on how to:

1. leverage public-private financing mechanism to afford energy retrofitting tailored to cities needs
2. allow EU municipalities to turn the existing public buildings stock into nearly Zero energy
3. further accentuate ESCO's reputation across European municipalities as pioneering actors in the nZEB market.
4. increase awareness among citizens of the benefits of nZEB such as reduced public energy consumptions and lower CO2 emissions.

CERTuS One2One meetings– How it Works

During the CERTuS slot we are arranging One2One meetings in order to provide in depth information about achievements for the energy retrofitting of existing buildings stock. Take advantage of talking with municipalities' representatives, financial partners or scientific/technical partners. Each One to One meeting will last no more than 15 minutes. If you are interested in, please register at <https://www.eventbrite.it/e/mechanisms-for-nzeb-renovation-of-existing-public-building-stock-tickets-25400724250> in order to be scheduled in advance.

To know more about project partners visit <http://www.certus-project.eu/index.php/en/>

Please do not hesitate to contact for any information: certusproject@comune.messina.it

We would be happy to meet with you in person.

Kind regards
